

alt\_ecc\_fatal\_exception  
\_register

```
graph LR; A[alt_ecc_fatal_exception_register] --> B[alt_dcache_flush]
```

A diagram showing a flow from a register to a flush operation. On the left, a gray rectangular box contains the text 'alt\_ecc\_fatal\_exception' on the top line and '\_register' on the bottom line. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'alt\_dcache\_flush'.
